Arcane Contracting Company

## Who We Are

Arcane Contracting Company is a specialized civil and infrastructure construction firm with extensive field experience in delivering high-quality engineering support and project execution. Over the years, we have earned the trust and appreciation of our esteemed clients by strictly adhering to project specifications, safety protocols, and demanding schedules. Our management is deeply committed to implementing stringent quality controls that conform to the high standards of modern technological developments and international engineering practices. We understand the dynamic requirements of construction projects. Therefore, we provide immediate, effective, and reliable solutions, ensuring seamless operations during civil construction, road development, site development, and shutdown maintenance projects.

## Vision

To be recognized as a leading infrastructure and civil construction firm in Saudi Arabia, renowned for building our engineering excellence, reliable project delivery, and commitment to the Kingdom's future in alignment with Vision 2030.

## Mission

To deliver high-quality, cost-effective construction and infrastructure projects on schedule, by utilizing advanced methodologies and empowering focused engineering teams. We are dedicated to building lasting relationships with our clients based on safety, operational integrity, and exceeding project expectations."

## Core Values

- **Engineering Excellence:** We don't just build; we engineer solutions that ensure structural integrity and long-term durability.
- **Safety First:** Zero-compromise on the health and safety of our workforce and site operations.
- **Precision & Timeliness** : Strict adherence to project timelines and technical specifications to eliminate delays.
- **Transparency** : Open, honest communication with our clients, suppliers, and partners at every stage of the project.
- **Sustainability:** Employing eco-friendly construction practices and efficient resource management to minimize environmental impact.

## OUR EXPERTISE & TECHNICAL CAPABILITIES

- **1-Site Preparation & Earthworks**
- **Excavation & Backfilling:** Precision digging, trenching, and controlled backfilling for industrial and commercial foundations.
- **Land Clearing & Grading:** Removing obstacles and leveling vast terrains to prepare for heavy construction infrastructure.
- **Soil Stabilization:** Implementing advanced compaction and chemical stabilization techniques to secure ground bearing capacity.

- **2- Asphalt Paving & Road Development**

- **Highway & Industrial Roads:** Laying high-durability asphalt designed to withstand heavy traffic and extreme climatic conditions.
- **Wearing & Base Courses:** Precise application of sub-base, base, and wearing courses conforming to the highest engineering standards.
- **Internal Network Paving:** Developing internal road networks for residential complexes, industrial cities, and commercial hubs.

## SPECIALIZED CIVIL & MECHANICAL WORKS

- **3- Structural Civil Works & Infrastructure Assets**
  - **Hydraulic Structures:** Construction of heavy-duty reinforced concrete culverts, storm water networks, and industrial drainage systems.
  - **Cast-in-Place Concrete:** Execution of high-precision concrete curbs, structural retaining walls, and protective barriers conforming to project specifications.
  - **Site Hardscaping:** Professional installation of industrial-grade pavements, walkways, and heavy-duty concrete slabs for logistics areas.
- 
- **4- Specialized Mechanical Infrastructure**
  - **Industrial Trenching:** Execution of deep, secured excavations for underground utility corridors and piping networks.
  - **Pipeline Sleepers & Supports:** Civil and mechanical preparation for process piping, including concrete foundations and structural supports.
  - **Utility Network Burial:** Safe laying, bedding, and backfilling of electrical grids and fluid transmission pipelines under strict safety protocols.

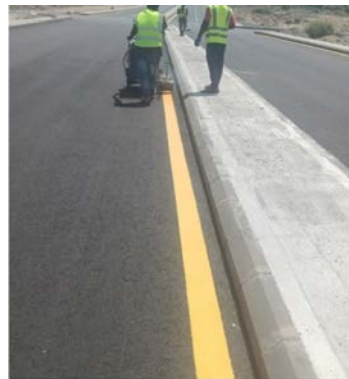

## ROAD MAINTENANCE & TRAFFIC SAFETY

- **5- Comprehensive Road Maintenance.**
- **Pavement Rehabilitation:** Executing precise asphalt milling, pothole repairs, and crack sealing to extend the service life of highway assets.
- **Surface Treatment:** Applying advanced micro-surfacing and slurry seals to restore skid resistance and improve road durability.
- **Structure Maintenance:** Inspecting and repairing concrete structures, storm-water drains, and industrial culverts to prevent structural failures.

- **6- High-Visibility Safety & Traffic Control**
- **Precision Road Markings:** Application of high-durability thermoplastic and cold plastic paints for lane markings, strictly complying with safety codes.
- **Signage & Guidance Systems:** Installation of high-intensity reflective traffic signs, gantry signs, and industrial warning boards.
- **Passive Safety Assets:** Supplying and installing heavy-duty steel guardrails, concrete New Jersey barriers, and solar-powered cat eyes.
